

SILKPEEL DERMALINFUSION MICRODERMABRASION

IS SILKPEEL DERMALINFUSION MICRODERMABRASION RIGHT FOR ME?

This is one of our most popular treatments! Honestly, it is a great choice for almost everyone. It's one of the only cosmetic treatments that you can do when you're pregnant. It's a great option if you're looking for a deep-clean and exfoliation. This treatment is great because you can customize your serum choice to tailor it to your specific needs. The serum options are:

Hydrating: to bring moisture to the cellular level

Vitamin C: to work as an antioxidant and brighten the skin

Skin Brightening: a great choice if pigmentation is a major concern

Pore Clarifying: excellent for acne and breakout-prone skin.

WHAT CAN I EXPECT DURING THE TREATMENT?

We will ask you to sign a consent form right before the treatment. This form will be explained thoroughly to you and you will have the time to ask questions. You will be seated in our treatment chair and put into a reclined position. The chair is able to move many different ways so don't be shy to ask for adjustments! Once you choose your serum, your only job is to sit back & relax! During the treatment, you will feel suction as well as a physical exfoliation (rubbing) from the tip of the handpiece. At the same time, you will feel moisture coming from the serum that is being injected directly into the skin. A complete treatment includes one pass on the neck and two passes on the face. In short, it will feel fabulous.

WHAT WILL HAPPEN AFTER THE TREATMENT?

There is no downtime with this treatment. Any redness that *may* be present will go away in an hour or so. Try to not touch your face (it will be tempting because it will feel SO SOFT). Apply a good sunscreen every day, with adequate UVA and UVB protection.

HOW MANY TREATMENTS SHOULD I DO?

This part is really up to you. You can choose to do a Silkpeel as frequently as every 2 weeks. We like to suggest it to our patients as a 'seasonal spring cleaning' treatment as a way to prime your skin for the challenges the upcoming temperature changes will bring.
