

Recommended Pre & Post Care for truSculpt ID Body Sculpting

For best results please follow these instructions

BEFORE YOUR TREATMENT:

- Excess hair may need to be shaved.
- Be well hydrated prior to treatment.
- Body piercings may need to be removed if under or near the treatment area.
- Notify the clinic of any changes to your health history or medications since your last appointment.

AFTER YOUR TREATMENT:

- Redness and swelling may occur and typically resolve within a few days.
- Palpable nodules that are tender to touch or lumps in the treatment area may develop in the treated area up to 72 hours following treatment, and typically resolve over several weeks.
 - Subjects from CUTERA clinical study were advised to gently massage the nodules for 2-5 minutes twice daily.
- Multiple treatments may be required.
- Notify the clinic if any of the following occur:
 - Blister, crusting or skin burns.
 - Tenderness, redness or swelling persisting longer than a few days.
 - Nodules that are tender to touch or lumps in the treatment area that lasts longer than 4 weeks.
 - These may develop up to 72 hours post-treatment and typically resolve over several weeks.
